OTE 85-6790

	MEMORANDUM FOR:	Deputy Director	for Science a	nd Technology			
	VIA:	Deputy Director	for Administr	ation			
25X1	FROM:	Director of Trai	ning and Educ	ration			
	SUBJECT:	FY 1987 Funding	for the DS&T	Training Program			
	1. When we discussed the DS&T Training Program in December 1985, we agreed that the Office of Training and Education (OTE) would include sufficient positions and funding in FY 1987 to cover the program. Unfortunately, the budget initiative (see attached) did not make it, and I will need your continued help to carry the program through FY 1987. I have requested funding in FY 1988 and, with your support, hope to be more successful.						
	2. Specifically, in FY 1987 I need roughly \$400K (an increase of \$100K over FY 1986) and four rotatees (an increase of one over our FY 1986 agreement). This increase will allow us to continue the successful initiatives begun during the past year, increase the number runnings per course, develop and help conduct requested new DS&T course such as those in management and supervisory training, and develop a training program that could be taken to remote sites.						
	3. I have taken two new positions from other OTE programs to work the DS&T account and plan to add \$25K for a modest amount of supplies and travel in FY 1986. I believe we have the first fruits of a successful , program and would appreciate your help for another year.
